

BE MORE AWESOME!

THE PROGRAM MESSAGE:

We hear it a lot; most of us say it a lot; but what IS awesome? Do you know what AWE is? Awe is wonder and amazement. It's something that makes you smile, feel joy, and makes you think, "WOOOOOOW!"

Maybe you've been told you're awesome, and you believe it-- at least most of the time—because **everyone really is awesome**. But who knows the limits of how much more awesome we can be, and will be, once we try new things!?

Movie clips, lots of action and fun music on our 3 giant screens will engage, captivate, and motivate your students!

KID PRESIDENT (otherwise known as **ROBBY NOVAK**), inspires millions of people with his motivational online videos, but what most people don't know is that he has a condition that has caused him to have over 70 broken bones. What makes him **more awesome** is that he never lets it stop him from having fun and sharing it with other people.

ANNA KING found out she really needs a new heart, but she decided that **HUMOR HEALS THE HEART**, and she started having fun actually singing about her gloomy situation! She learned that **optimism** works much better than worrying, and that it's also contagious!

In addition to Anna King and Kid President, your students will be inspired by several **awesome young artists, scholars and athletes**, and

The **pinnacle of awesomeness** will be illustrated by a whole team of boys who went out of their way to show their support in a unique way for a younger boy who was being mocked for his speech impediment, and the clothes he liked to wear.

This program includes a **powerful anti-bullying message**, as well as a fun approach to encouraging **healthy choices**.
